

AudioX

AudioX IP Audio encoder used in thousands of installations worldwide., network-enabled, analog audio IP encoder suitable for audio distribution, monitoring and transmission in Broadcast,

INTRODUCTION

AudioX is a single-channel encoder/streamer for audio processing in a cost-effective way. It supports professional encoding and IP streaming for live encoding & uploading, channel insertion, live broadcasting, AD/local program playback/streaming, remote meeting, digital signage and so on. In addition, AudioX also has the ability of streaming in the same time, which is believed to fit into more scenarios in the age of efficiency.
